**DETAILED ACTION**

**REASONS FOR ALLOWANCE**

1. The following is an examiner's statement of reasons for allowance: a method for reconfiguring a modem transmitter parameters during data mode is disclosed. The closest prior art, Li et al US Patent No. 5,864,560 and O'Connor et al US Patent no. 4,780,883, discloses similar method. However, Li et al and O'Connor et al do not teach or fairly suggest the limitations of "generating new modem transmitter parameters as a result of detection of a predetermined characteristic and transmitting the new parameter parameters to a modem in the data mode without switching to startup mode" are neither anticipated or rendered obvious by Li et al and O'Connor taken singularly or in combination.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
